Summary

I am a versatile Android-Developer experienced both in improving and maintaining large applications as well as in greenfield projects.

Experience

2020 – present

Android-Developer
Star Finanz GmbH

Development of the Sparkassen-App, Germany's most used banking app. Duties included adding and refactoring major features in Kotlin while maintaining a sizeable Java codebase stretching back to the beginning of the Play Store. I worked on a re-architecture and redesign of the account-opening flow in version 5 as well as a major design refresh of the entire app for version 6.

2016 – 2020

Mobile-Developer
For-Sale Mobile GmbH

Worked on the development of a cross-platform Smart Home application for Liebherr Fridges using Xamarin, seeing the project from project creation to Play Store release, eventually becoming its lead maintainer while version 2.0 was in development.
I also worked on and maintained some smaller projects for Liebherr (nutrition and storage advice, manual management) and other clients (e.g. event experiences)

2016

Software-Tester
Orange Networks GmbH

Development of coded UI tests for a web application for IT-Admins to manage software deployment in large organisations.

Languages

Kotlin (proficient) ♥ ♥ ♥ ♥ ♡   Java (proficient) ● ● ● ● ○

Education

2017 – present
Master of Divinity (equiv.)
Theology
University of Hamburg

2014 – 2017
Bachelor of Science (not completed)
Computer Science
University of Hamburg

Civic Engagement

St. James Principal Church
Hamburg

I volunteer in my congregation as an elected member of the parish council, currently on my second term. I am responsible for public relations coordination and leadership, leading a working group of pastoral and administrative staff as well as volunteers. During my tenure, we relaunched our website (https://jacobus.de) and offered online services during the Coronavirus pandemic.

In addition to this, I serve as both a lector and lay preacher during services. I also sing in the Church Choir.

University of Hamburg
Hamburg

I have served as a Student representative for a combined six terms in both faculties during my studies. I have also served as a liaison between the student body and the teaching staff in multiple departments.

Skills

Android Development, Kotlin, Java, Material Design, Jetpack Compose, Navigation Architecture, MVVM
